VA / DoD Synchronization

Update
10/02/03

VA/ DoD Efforts

- Using the DUNS number as driven by the CCR to ensure that the name and information from a given entity is consistent with all contracts.

- Working with DSCP to follow their course of action to coordinate naming database and CCR linkage

- Working on previous contracts to adjust data to meet the CCR information where logical

VA Working Efforts

- Incorporating CCR vendor file to auto populate contract information including vendor name.

- Attempting to create an automatic method to reconcile VA db contracted vendor information with the CCR vendor file.

Anticipated Outcome

- Clean up of the vendor information in the VA database as it relates to the vendor
- Additional building block to allow for cleaner record and data flow between the VA & DSCP

Next Steps

- VA is continuing to convert paper pricelists to electronic media. We presently have 400K unique medical surgical, dental, and mobility device items on the searchable web tool.
